

OUR MISSION

Education Through Music–Los Angeles’ mission is to provide and promote quality music education in under-resourced schools as part of the core curriculum for every child in order to nurture students' academic achievement, and their creative and overall development.

- Founded in 2006 as an independent 501(c)3 non-profit based on the ETM model established in NYC in 1991.
- Began serving 800 children and has grown to serve approximately 21,000 students.
- Program includes weekly, yearlong music.
- Disciplines taught include strings, songwriting, ukulele, band, music technology, guitar, recorder, chorus, and general music.

OUR OBJECTIVES

ETM-LA’s goal is to ensure that every child has access to a complete & comprehensive standards-based music education. We form partnerships with under-resourced elementary & middle schools and create individualized plans with the following objectives:

- High-quality, sequential and yearlong music instruction for every student.
- Ongoing mentorship and professional development for music and classroom teachers.
- Engagement of parents and educators in understanding how music education is essential to a child’s academic growth and development.
- Ongoing assessment and evaluation.

A BRIEF HISTORY

Founding Executive Director Victoria Lanier - a professional violinist and music educator - worked for ETM in under-resourced New York communities as a Program Coordinator and Teaching Artist, along with programs for Carnegie Hall and NJ Symphony. Upon moving to LA and encountering the great need for comprehensive school-based music programs and recurring requests from schools and principals, Lanier founded ETM-LA to further the mission of ensuring equity and access through music education.

OUR MISSION

Education Through Music-Los Angeles partners with under-resourced schools to provide and promote quality music education in under-resourced schools as part of the core curriculum for every child in order to nurture students' academic achievement, and their creative and overall development.

OUR IMPACT

49 Partner Schools (2021-22)
